PROFILE

Techno-Functional Odoo Consultant & **Development Team Lead** | **Odoo 18 Certified Functional Consultant** with **4+ years** of experience delivering **15+ end-to-end ERP implementations** across industries — from requirement analysis and solution architecture to development, deployment, and post-go-live support.

Currently leading a team at **Synodica Solutions** (Odoo Silver Partner), managing multiple concurrent projects while driving client strategy, hiring, and technical mentorship. Experienced across **Odoo 11.0–19.0**, with a strong focus on delivering scalable, business-driven ERP solutions.

I specialize in **complete project ownership** — handling client communication, gap analysis, solution design, custom development, integrations, server setup, and user training.

CORE COMPETENCIES

TECHNICAL	Python • PostgreSQL • JavaScript / OWL • XML • REST APIs • Git • Linux • AWS • GCP • Odoo.sh • Odoo 11.0–19.0

LANGUAGES	English (Professional) • Hindi (Native) • Gujarati (Native)

SERVICES

- ERP Implementation
- Custom Module Development
- Third-Party Integration
- Functional Consulting
- Odoo Training & Support
- Server Setup & Deployment (AWS / GCP / Odoo.sh / Contabo)

PROFESSIONAL EXPERIENCE

Synodica Solutions Pvt. Ltd., Surat *— Odoo Silver Partner*

Development Team Lead *Sep 2024 – Present*

- Leading 7 developers across 4 concurrent projects; driving architecture decisions, resource allocation, and delivery timelines
- Led talent acquisition — conducting technical interviews and finalizing hires for the development team
- Spearheading client strategy: requirement analysis, gap assessment, solution design, and go-live planning
- Increased team productivity by **30%** by introducing AI-driven development workflows and mentoring developers
- Reduced project delivery delays by **25%** through structured & improved deployment processes, and streamlined workflows

Senior Software Engineer *Mar 2024 – Present*

- Delivered **15+ full-cycle ERP projects** spanning HR, Retail, Manufacturing, Facilities, and IT Services — from requirement gathering and client communication to development, server setup, and go-live support
- Independently managed client relationships, translating business needs into technical solutions and functional workflows, achieving **20%** improvement in client retention
- Improved development speed by **15%** by enforcing coding standards, conducting code reviews, and optimizing workflows

Software Engineer *Dec 2022 – Feb 2024*

- Revamped a **10,000+ line legacy module**, improving system performance by **30%** and reducing technical debt
- Delivered **4 projects**, increasing client satisfaction by **20%** by reducing turnaround time and minimizing rework

Junior Software Engineer *Sep 2021 – Nov 2022*

- Customized and maintained Odoo applications including module design, troubleshooting, and testing
- Applied coding standards and contributed to feature development within Agile teams

KEY PROJECTS

Premium Car Servicing & Spare Parts Reseller — KSA

- Architected end-to-end HR, Payroll, Accounting & Sales ecosystem for **300+ employees** across multi-company, multi-branch setup — reducing manual work by **60%**
- Streamlined overtime & violation management with full labor law compliance; built employee self-service portal, shift management with approvals, and end-of-service module per local regulations
- Integrated WooCommerce (**1,000+ orders/month**) and ZATCA e-invoicing (**1,500+ invoices/month**); consulted and assisted the client to migrate their full accounting process to Odoo
- Launched multi-channel helpdesk with WhatsApp bot, reducing ticket response time by **40%**; designed custom appraisal workflows with bonus and allowance management

  Modules: Accounting, Payroll, HR, Attendance, Sales, Purchase, Helpdesk, CRM, Appraisals, Inventory, Expense, Timeoff, Portal

Pharma & Medical Equipment Manufacturer

- Orchestrated full manufacturing workflow — raw materials to finished goods — with strict regulatory compliance for **225 employees**, cutting production tracking errors by **50%**
- Customized Shopfloor module: custom production flows, batch generation, split work orders, unbuild MO logic, and samples workflow; revamped QC process at every production stage
- Configured structured sales workflow (Quotation → Proforma → Sale Order → Tax Invoice) and storage-capacity-based inventory management across **5+ warehouse locations**
- Engineered XML integration with Tally for invoicing; consulted and migrated full accounting into Odoo, consolidating **3 separate systems into 1 unified ERP**. Produced cost-per-employee, per-process, and per-department analytics with custom dashboards

  Modules: Manufacturing, Quality, Sales, Accounting, Purchase, Inventory, HR, Payroll, Attendance, Dashboards, Maintenance, Repairs

Elevator Maintenance & Subscription Company

- Developed automated maintenance scheduling tied to subscription plans for **35+ technicians** and **70 internal users**, reducing missed service visits by **35%**
- Crafted custom WhatsApp flow serving **4,000+ customers** — enabling self-service for subscriptions, visit reports, maintenance requests, and payments, replacing **50%** of the call center team
- Connected LanaTime attendance devices for real-time workforce tracking; Messagebird for contact synchronization
- Established SMS fallback notifications when WhatsApp delivery fails — achieving **98% customer notification** rate across subscription status, maintenance, and service updates

  Modules: CRM, Subscription, Maintenance, Attendance, Contacts

IT Service Company — Hourly Billing & Subscription Platform

- Designed subscription-based hourly billing system: customers purchase monthly hour packages with automatic allocation to projects and auto-renewal on payment, eliminating **100% of manual billing**
- Built full customer portal — track consumed hours, task progress, and purchase extra hours directly from sale orders with real-time project allocation, reducing client queries by **45%**
- Set up Backblaze storage integration for all documents, attachments, and automated database backups (replacing default Odoo.sh filestore); managed Odoo.sh project deployment
- Implemented customer onboarding with multi-step verification and auto-fraud detection; enforced strong password policy and mandatory 2FA. Established purchase workflow with multi-level approvals

  Modules: Subscription, Project, Timesheet, Sales, Purchase, Website

CERTIFICATIONS

- **Odoo 18 Functional Certification** — Odoo S.A.
